

# ASIGRA DS-Client Installation Support (32-bit / 64-bit)

<sup>1</sup> Operating System support available for **English and German versions** only

<sup>2</sup> Non-clustered instances of MS SQL Server 2005/2008 for standalone DS-Clients; for Grid DS-Clients, clustered MS SQL Server 2005/2008 is supported

<sup>3</sup> ASIGRA supports MS SQL Server: **2005 / 2008 / 2008 R2 – Enterprise / Standard / Express editions.**

<sup>4</sup> Grid DS-Client is not supported on Windows XP Home

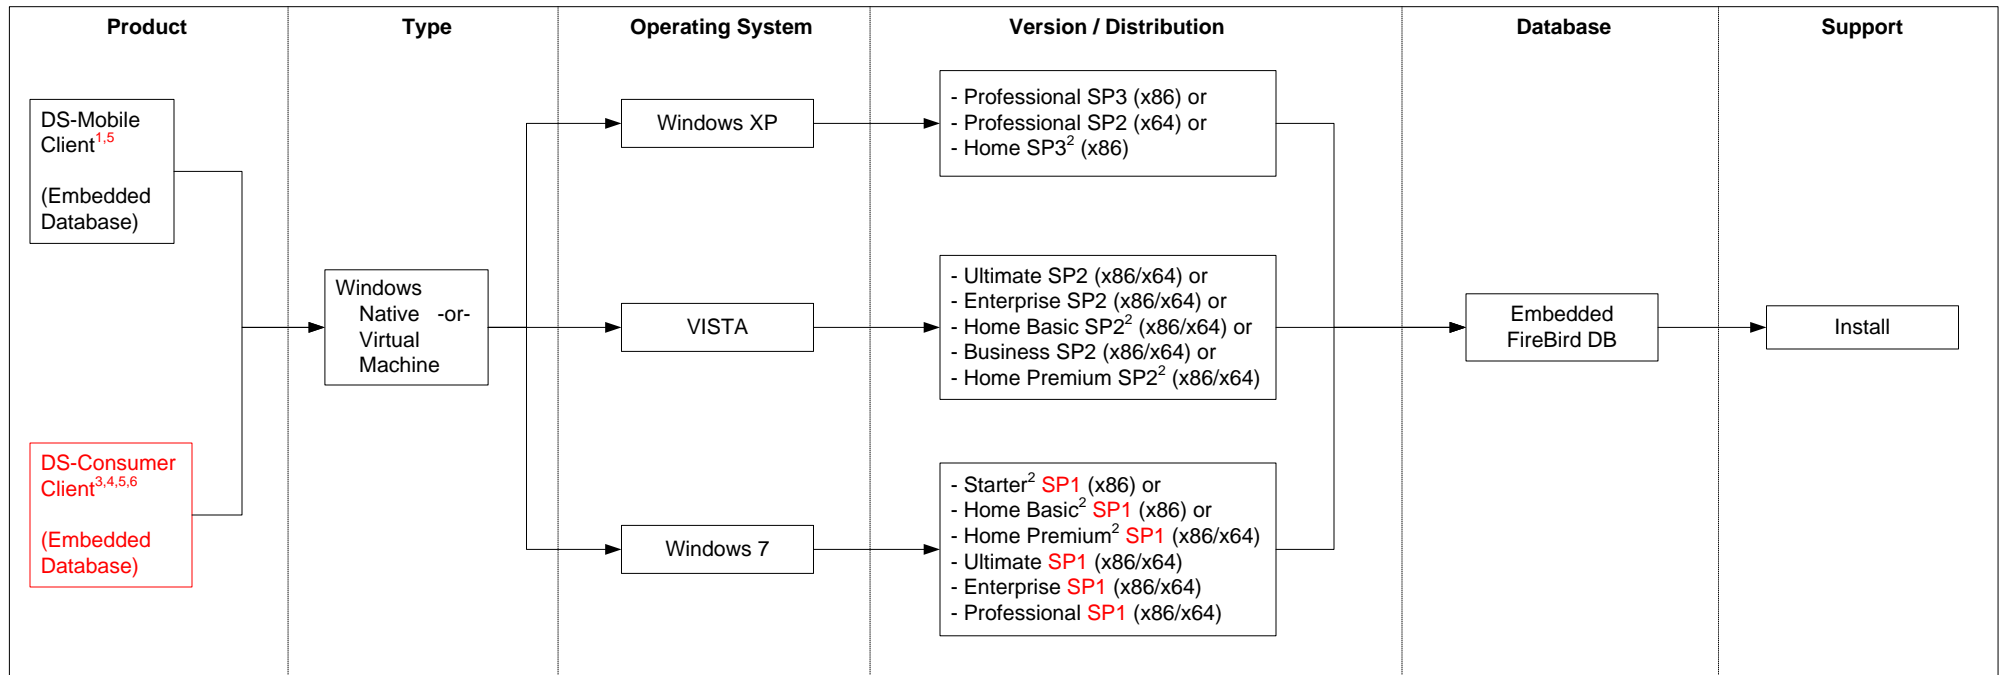

<sup>5</sup> **Only one installation of either DS-Client, DS-Mobile Client or DS-Consumer Client is supported per machine.**

**Notes:** - Win32 DS-User installation is supported on all Windows-based platforms on which the Windows DS-Client is supported

- Java DS-User installation is supported on all platforms on which the DS-Client (Windows / Linux / Mac) is supported

- 32-bit installations are only supported on 32-bit Operating Systems / 64-bit installations are only supported on 64-bit Operating Systems

## ASIGRA DS-Mobile Client / DS-Consumer Client Installation Support (32-bit / 64-bit)

<sup>1</sup> Operating System support available for **English and German versions** only.

<sup>2</sup> Mass Deployment via Active Directory not supported due to Microsoft's lack of support for joint accounts on Active Directory.

<sup>3</sup> DS-Consumer Client can only back up the local machine.

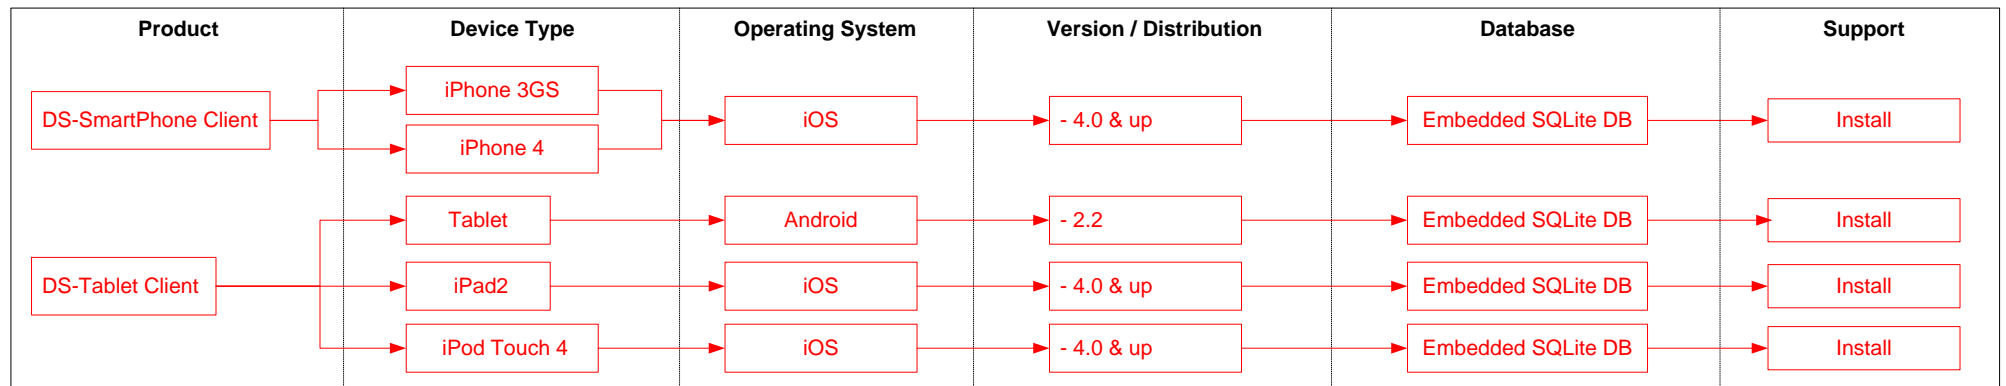

<sup>4</sup> Operating System support available for **English version** only.

<sup>5</sup> Only one DS-Client / DS-Mobile Client / DS-Consumer Client installation is supported per machine.

<sup>6</sup> Mass Deployment is not supported for DS-Consumer Client.

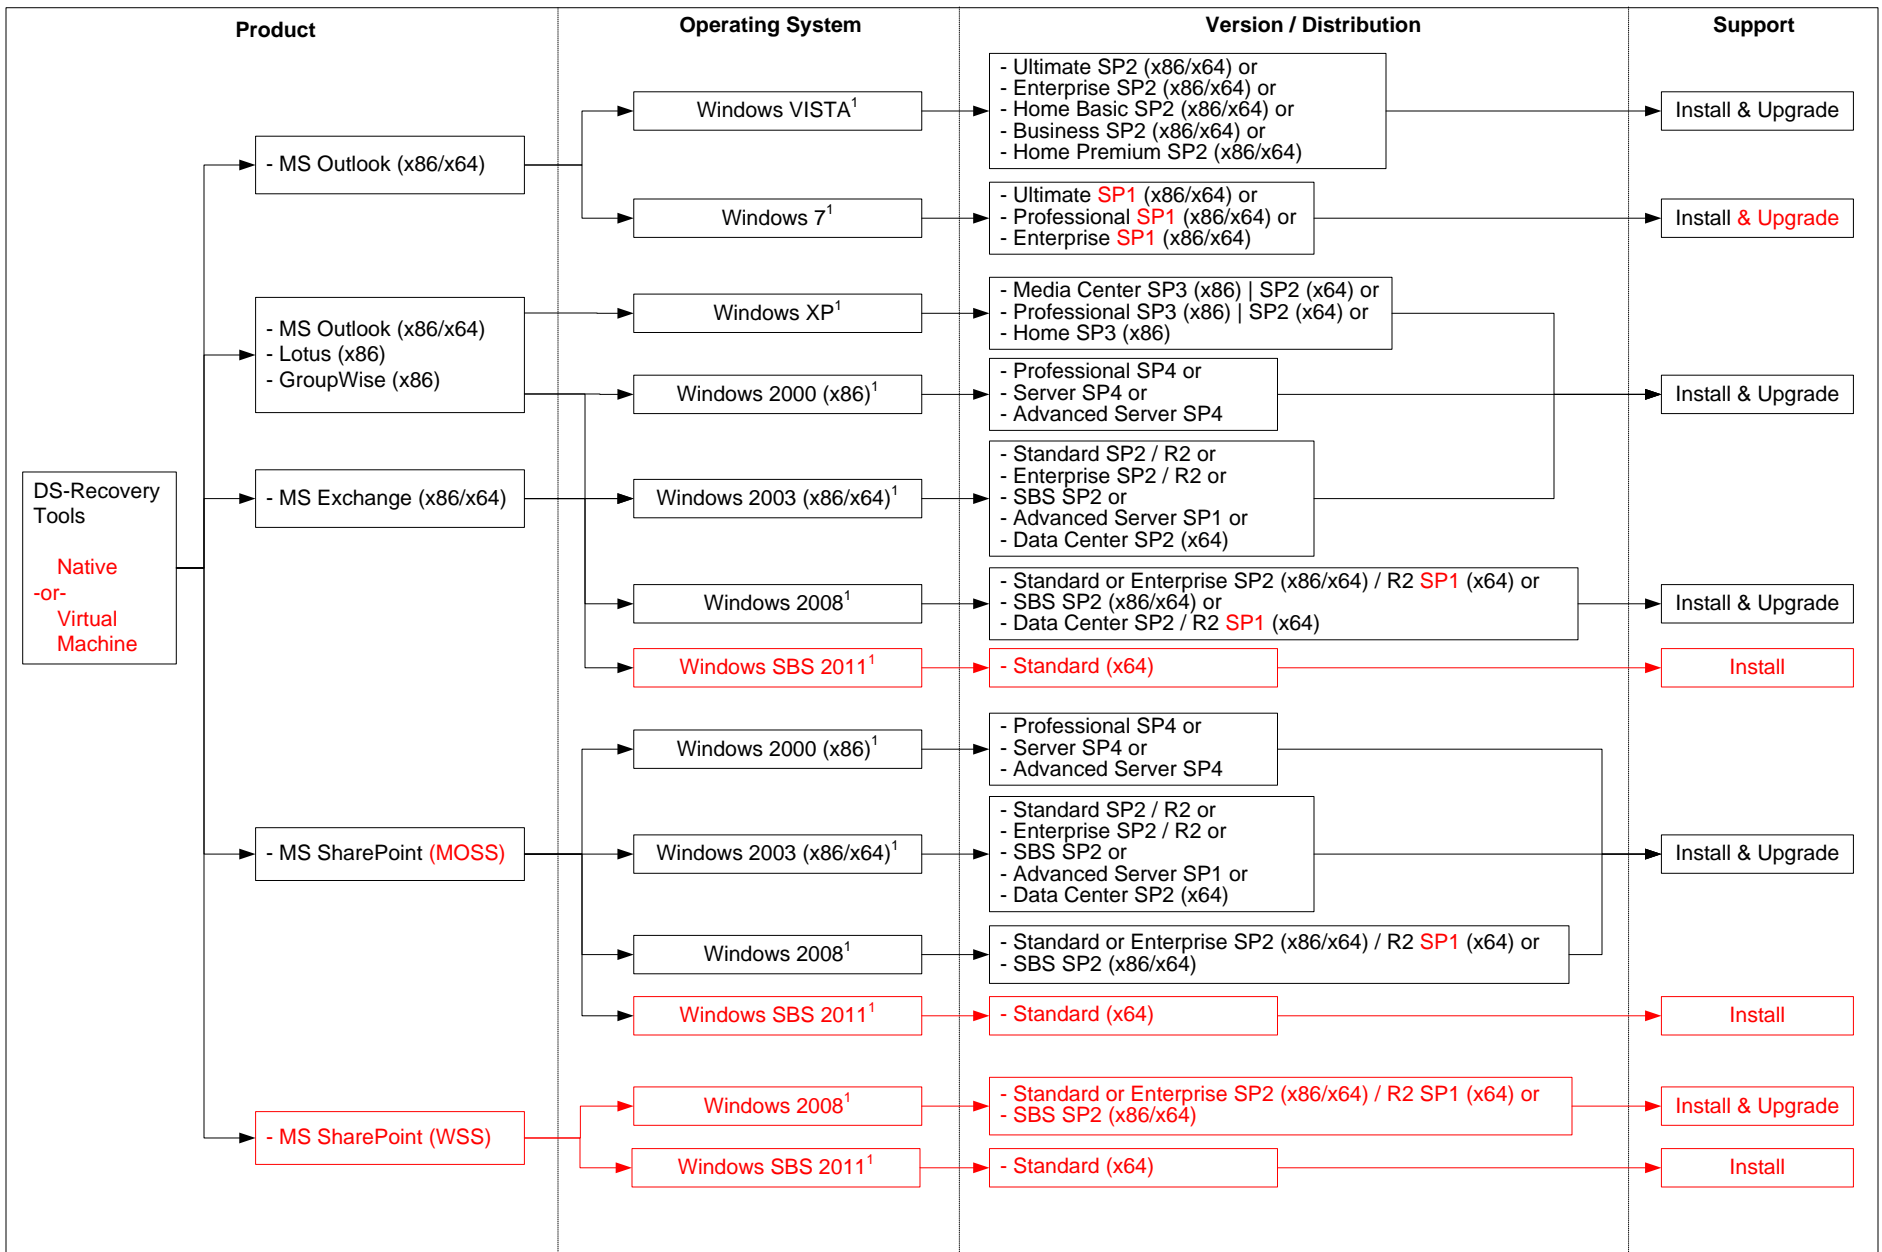

- Notes:**
- DS-Mobile User installation is done together with the DS-Mobile Client on the same machine.
  - ONECLICK DS-User installation is done together with the DS-Consumer Client on the same machine.
  - DS-Mobile User / ONECLICK DS-User cannot be installed on a separate machine from the DS-Client service.

## ASIGRA DS-SmartPhone Client / DS-Tablet Client Installation Support

**Note:** - You must have a WIFI connection on these devices in order to download the installation from the Internet.

# ASIGRA DS-Recovery Tools Installation Support (32-bit / 64-bit)

<sup>1</sup> Operating System support available for **English and German versions** only
